

RSC GROUP

COMPANY PROFILE

TECHNICAL SERVICES FOR INDUSTRIES ACROSS AFRICA.

RSC Group delivers specialist industrial services across Africa, helping clients protect critical assets, complete complex projects & maintain operational facilities.

OUR MISSION

Our mission is to consistently deliver world-class industrial services across Africa while maintaining the highest international safety standards.

We aim to exceed our clients' expectations by delivering quality projects on time and within budget. Professionalism, integrity and attention to detail have been part of the RSC business since day one and continue to guide the way we work across the continent.

1987	13	+2,000	+20
ESTABLISHED	AFRICAN LOCATIONS	EMPLOYEES	INDUSTRIAL SERVICES

Through innovation, experience and a practical approach to problem-solving, we deliver value to our clients and build long-term relationships that **stand the test of time**.

RSC remains committed to skills development, training and creating opportunities in the countries where we operate, ensuring our business continues to make a positive contribution **across Africa**.

COMPANY BACKGROUND

Founded in 1987 by Louis Glen Sacks, RSC Group has grown from a small abrasive blasting and protective coatings business in Krugersdorp into one of Africa's most established industrial services providers.

Today, RSC partners with multinational EPCs, contractors and asset owners to deliver projects across some of the continent's most demanding mining, power, petrochemical, infrastructure and oil & gas environments. With an established footprint across Africa, local ownership structures in many of its operating regions and approximately 2,000 employees, the group combines local knowledge with decades of experience to deliver safe, high-quality work wherever it operates.

RSC's service offering has expanded organically over the years and now includes abrasive blasting, industrial coatings, corrosion protection, tank linings, scaffolding, rope access, insulation, HP and UHP cleaning, rubber lining, passive fire protection and a range of other specialised industrial services.

The group continues to invest in skills development, training and local employment across its countries of operation while maintaining the highest standards of safety, quality and customer satisfaction.

HEAD OFFICE FACILITIES

Based in Krugersdorp, South Africa, the RSC head office serves as the group's shared services hub, providing support to its operations across the African continent.

The facility is home to dedicated Quality, Safety, Estimating, Procurement, Training and Logistics teams, ensuring each branch has the resources and expertise required to deliver projects efficiently and safely. Spanning **142,000m²** with a further 6,000m² of under-cover facilities, the site has been designed to support large-scale industrial projects. Its capabilities include **tower cranes**, **mobile cranes** and specialised pipe handling equipment, enabling a throughput of **up to 2,000 tonnes** of steel per month. RSC's rubber lining facility includes two autoclaves and a dedicated processing area capable of producing up to 2,000m² per month, while the plural component facility supports 100% solids by volume applications typically used for drinking water pipes and vessels.

Safety remains a priority across all operations. RSC maintains an ISO 9001-certified Quality Management System and continues to work towards a zero LTIFR across the group.

- Located in **Krugersdorp**, South Africa
- **142,000m²** operational footprint
- **6,000m²** under-cover facilities
- Throughput of up to 2,000 tonnes of steel per month
- **10 tower cranes** & **4 Mobi-Lift cranes**
- 50-ton mobile crane
- Dedicated **rubber lining facility**
- Two autoclaves
- **ISO 9001** certified
- Focused on achieving a zero LTIFR

SERVICES OFFERED

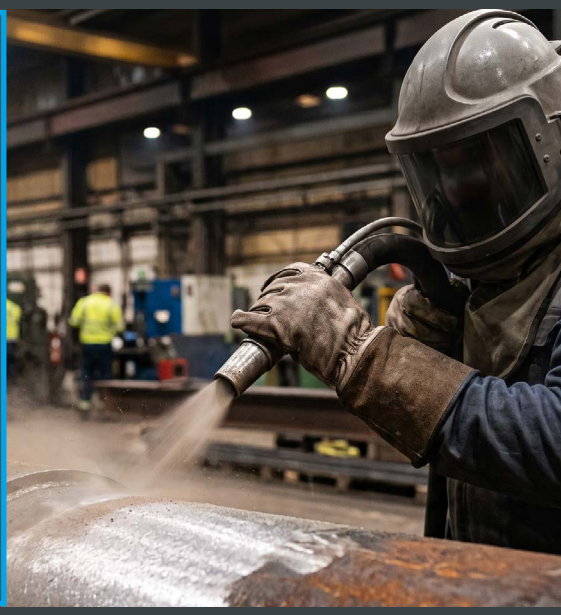

DELIVERING **INDUSTRIAL SERVICES ACROSS AFRICA** SINCE 1987

With 40 years of experience, RSC offers a comprehensive range of industrial services to clients across the mining, power, petrochemical, infrastructure and oil & gas sectors throughout Africa.

ABRASIVE BLASTING

Specialist abrasive blasting services support corrosion protection and extend the life of critical assets.

- Surface preparation to SANS S.A.2.5 and S.A.3 standards
- Wet and dustless blasting
- Garnet, glass bead and aluminium oxide blasting
- Ultra-high-pressure water surface preparation
- Quality control testing and client data packs

CORROSION PROTECTION

Corrosion protection solutions are designed to maintain structural integrity and reduce long-term maintenance requirements.

- Surface preparation
- Ambient and substrate conditions
- Coating application methodology
- Fire-resistant coating systems
- Wear protection solutions

INDUSTRIAL PAINTING, TANK LININGS & FLOOR COATINGS

Industrial coating solutions are designed to protect assets and improve long-term performance in demanding environments.

- Mining
- Oil & Gas
- Petrochemical
- Power generation
- Industrial facilities

SCAFFOLDING

Safe, reliable access solutions support maintenance, shutdown and construction projects across a range of industries.

- Scaffold erection and dismantling
- Scaffold inspections and handovers
- Hanging scaffolds
- Access platforms
- Load-bearing scaffold structures

CONCRETE REHABILITATION

Concrete rehabilitation services help extend asset life and maintain the integrity of critical infrastructure.

- Concrete repairs and rehabilitation
- Reinforcing steel rehabilitation
- Corrosion inhibitor applications
- Epoxy floor preparation
- Bund wall, plinth and conveyor repairs

SECONDARY CONTAINMENT & ACID PROOF LININGS

Secondary containment and acid proof lining systems are designed to perform in highly corrosive environments.

- Acid Resistant Brick systems
- Glass Flake Linings
- Vinyl Ester and Modified Epoxy systems
- Polyester High Performance systems
- Plant surveys and concrete rehabilitation

HOT, COLD & ACOUSTICAL INSULATION

Thermal and acoustical insulation solutions support safe and efficient operations across multiple industries.

- Hot and cold insulation solutions
- Aluminium, stainless steel and galvanised cladding
- Cryogenic applications
- Aerogel insulation
- Polyisocyanurate, Perlite and Cellular Glass systems

HP & UHP CLEANING

High and ultra-high-pressure water jetting services provide an environmentally responsible cleaning and surface preparation solution.

- Removal of aged coatings
- Tank cleaning and desludging
- Tube bundle cleaning
- Furnace and boiler cleaning
- Removal of marine growth fouling

INDUSTRIAL SHEETING

Industrial sheeting services are delivered safely and efficiently across a wide range of operating environments.

- Experienced sheeting applicators
- Rope access capabilities
- Scaffolding support
- Strong safety culture
- Minimal operational disruption

DENSO STEEL PROTECTION

Anti-corrosion tape systems provide long-term protection for steelwork and plant.

- Above-ground tape wrapping
- Buried piping tape wrapping
- Waterproofing
- Tank base protection
- Doping and wrapping

FIRE PROTECTION

Fire protection systems are designed to safeguard critical infrastructure and meet project-specific requirements.

- Intumescent coatings
- Cementitious fireproofing
- Spray-applied fire resistive materials
- Rigid board systems
- Technical and field support

CERAMIC LINING

Industrial wear lining systems are tailored to address specific wear challenges and minimise downtime.

- Mills
- Piping
- Fans
- Coal chutes

RUBBER LINING

Rubber lining solutions provide wear and corrosion protection for critical equipment and assets.

- High-performance wear protection
- Corrosion resistance
- Workshop and on-site applications
- Extended asset life
- Reduced maintenance requirements

ASBESTOS REMOVAL

Accredited asbestos removal services are delivered safely and in full compliance with regulatory requirements.

- Roof sheeting removal
- Gutter removal
- Cladding removal
- Lagging removal
- Pipe and storage tank removal

PIGGING

Pipe pigging services support inspection, maintenance and operational efficiency across pipeline infrastructure.

- Product separation
- Internal pipeline cleaning
- Inline inspections
- Geometric data collection
- Planned maintenance support

ON-SITE FULL TURNKEY PLANT MAINTENANCE

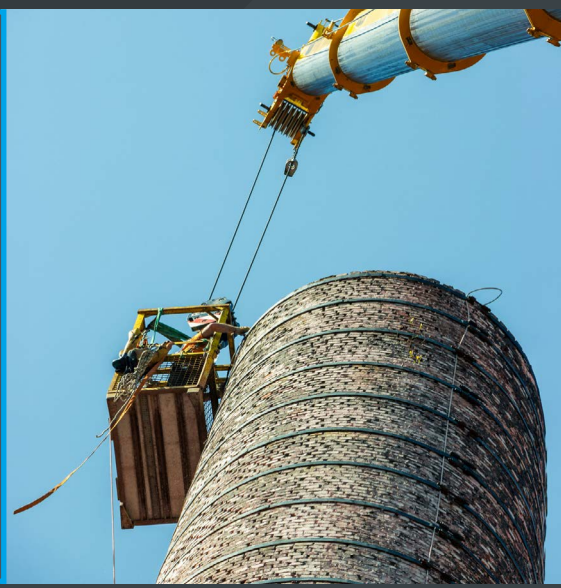

Integrated plant maintenance services provide a single point of accountability across multiple industrial disciplines.

- Single point of contact
- Reduced project complexity
- Improved operational efficiency
- Proven safety and quality standards
- Access to specialised teams across Africa

ROPE ACCESS

Rope access services provide safe and efficient access to areas beyond the reach of traditional methods.

- Reduced disruption to operations
- Faster mobilisation
- Certified rope access technicians
- Improved access to difficult areas
- Safe and efficient execution

ADDITIONAL SERVICES

Additional specialised services complement RSC's core industrial offering, enabling clients to access a broader range of capabilities through a single, trusted partner.

- **Industrial supplies** – Supply of specialised PPE and safety equipment.
- **Conveyor belt splicing** – Conveyor maintenance and support services.
- **Industrial vacuumation** – Industrial cleaning and material removal services.
- **Oil & Gas fabric** – Specialist fabrication services for the oil and gas sector.

OUR **COMMITMENT**

For 40 years, RSC has built its reputation on doing the right thing, delivering quality work and putting safety first. These principles continue to guide our business across every country in which we operate:

- **SAFETY**
- **QUALITY**
- **INTEGRITY**
- **PROFESSIONALISM**
- **ACCOUNTABILITY**
- SKILLS **DEVELOPMENT**
- LONG-TERM **RELATIONSHIPS**
- CONTINUOUS **IMPROVEMENT**

Every project, **every client** and **every partnership** is approached with the **same commitment** that has shaped RSC since 1987.

OUR **SUBSIDIARIES**

RSC INDUSTRIAL SERVICES

RSC Industrial Services is a **Level 2 BBBEE contributor** and a **60% Black woman-owned** entity established to support authentic empowerment, skills development and supplier growth in South Africa.

The business has successfully delivered work on major projects including Anglo Precious Metals Refinery and Kusile Power Station, providing services such as painting, insulation and scaffolding.

RSC INDUSTRIAL SUPPLIES

Established to support the group's expanding African footprint, RSC Industrial Supplies provides specialised PPE and safety equipment to both internal operations and external clients.

Today, the business supplies a wide range of safety equipment across multiple industries and is recognised as a Level 1 BBBEE contributor.

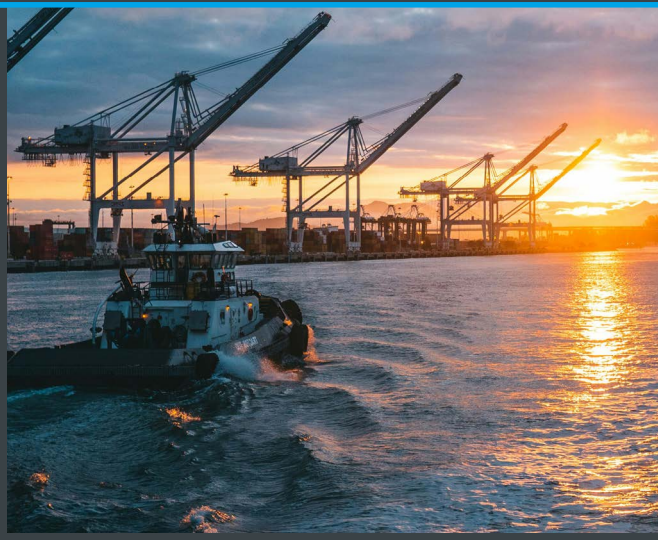

RAND SANDBLASTING PROJECTS COASTAL

Established in 2008, Rand Sandblasting Projects Coastal extends the group's capabilities across KwaZulu-Natal and South Africa's coastline.

The business specialises in industrial painting, abrasive blasting, hot and cold insulation, HP and UHP cleaning, scaffolding, industrial sheeting and rope access, and a **Level 2 BBBEE**.

SPECIALIST
BUSINESS UNITS

RSC OIL & GAS

SAFETY. PRECISION. RELIABILITY

Specialist onshore, offshore and industrial services.

- Protective Coatings & Corrosion Protection
- UHP Cleaning
- Corrosion Under Insulation (CUI)
- NDT Testing
- Membrane Systems
- Surface Preparation
- Abrasive Blasting
- Scaffolding
- Rope Access
- Insulation & Cladding
- Passive Fire Protection & Intumescents
- Tank Linings & Containment
- Bolting
- Industrial Sheeting & Cladding
- Hazardous Material Removal
- OPITO Rigging (Stage 1 to 4)
- NACE Inspections & Assessments
- Asbestos Removal (Engine Rooms)
- Corrosion Surveys & Maintenance Plans

Delivering **turnkey maintenance solutions** & **specialist support services** to the onshore and offshore oil & gas sector.

HEALTH, SAFETY, ENVIRONMENT (HSE) & CERTIFICATIONS

A zero-harm approach underpins all RSC Oil & Gas operations.

- ISO 9001 (Quality) Accreditation
- ISO 45001 (Safety) Accreditation
- Compliance with international marine and offshore regulations
- Proven zero LTIFR performance
- IRATA & IFW Accreditation
- OPITO / BOSIET Approval
- WJA Approval (Water Jetting)
- DROPS Approval
- AIA Approval (Asbestos)
- NACE / AMPP Certified
- Comprehensive insurance cover, including Liability, Offshore, Hospitality and Mobility

AFRICAN FOOTPRINT

RSC Oil & Gas combines specialist offshore expertise with the support of an established African network, enabling rapid mobilisation and localised support across the continent.

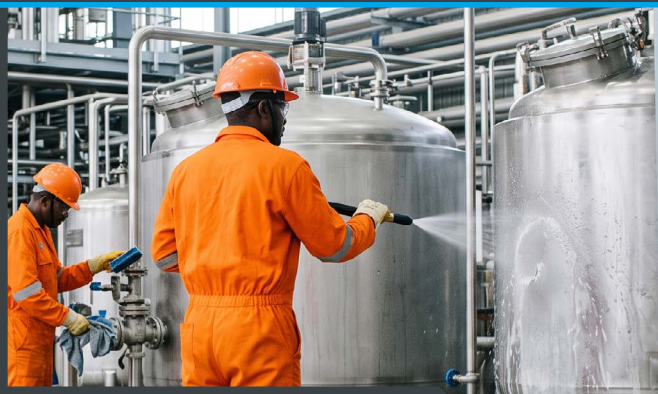

- **South Africa** – Durban, Richards Bay, Cape Town, Port Elizabeth and Mossel Bay
- **Mozambique** – Maputo, Beira, Tete and Nacala
- **Namibia** – Walvis Bay, Swakopmund and Lüderitz
- **Ghana** – Takoradi and Tema
- **Tanzania** – Dar es Salaam
- **Kenya** – Mombasa

Supported by 13 African industrial hubs and locally registered entities, RSC Oil & Gas is **well positioned to deliver specialist services wherever clients operate**.

INDUSTRIAL VACUUMATION SERVICES

Specialist industrial cleaning solutions tailored to the needs of the mining, petrochemical, power generation and broader industrial sectors.

CORE SERVICE OFFERINGS:

HIGH PRESSURE WATER JETTING
(UP TO 1,000 BAR)

- Removal of debris and scale from surfaces and pipelines
- Equipment cleaning
- General industrial cleaning applications

ULTRA-HIGH-PRESSURE WATER JETTING
(UP TO 2,500 BAR)

- Heavy-duty cleaning applications
- Deep surface preparation
- Descaling and contaminant removal

SPECIALIST **INDUSTRIAL CLEANING.** BUILT FOR DEMANDING SITES.

HIGH-FLOW VACUUM CLEANING

- Removal of dry and wet materials
- Confined space cleaning
- Silo, pit and process area cleaning

PLANT CLEANING

- Comprehensive industrial facility cleaning
- Planned shutdown support
- Improved plant safety and operational performance

HIGH-FLOW TANK CLEANING

- Cleaning of storage tanks, vessels and reactors
- Improved hygiene and compliance
- Reduced downtime

KEY CAPABILITIES

- Industrial vacuumation specialists
- Water jetting up to 2,500 bar
- Tank and vessel cleaning
- Confined space cleaning
- Shutdown support services

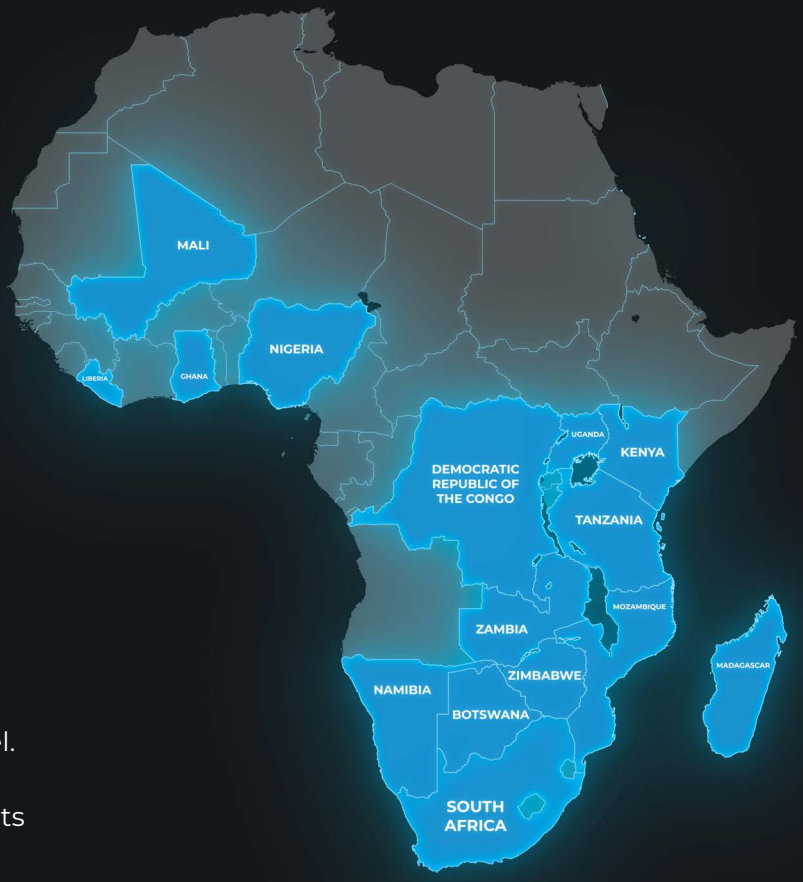

WHY RSC-MDI?

- Specialist industrial cleaning expertise
- Support from the broader RSC Group
- Experienced field teams
- Strong safety culture
- Rapid mobilisation capabilities

RSC GROUP
LOCATIONS

Since its inception in 1987, the RSC Group has experienced organic growth in both its footprint and product lines. A key strength of the Group lies in its capability to deploy efficiently to industrial hubs across the African continent, from which we service even the most remote sites.

Our growth and scalability have been driven by leveraging our shared services center and a team of trained and proven Africa-ready personnel. This approach enables us to support numerous multinational organizations in their African projects with unmatched expertise and reliability.
